

Baa Baa Black Sheep Croquet

INSTRUCTIONS

1. A very simple game and instructions. Print off the ten templates below and either laminate them or stick them onto some cardboard like a cereal box.
2. Cut out the shapes and fold in half along the dotted line and you are ready to go.
3. Place them like an upside down V so they are free standing around the room or in the garden. The idea is that each player takes a turn trying to get the ball through the sheeps' legs starting with number one and the winner being the first one to complete them all. Younger children can just roll the ball through but older children could also use toy golf sticks or croquet mallets etc. Also you can encourage younger children to practice their numbers by finding the next wicket they have to go through!
