

Star Lamp

Materials You Will Need:

Paper

Cardboard or laminator sheets.

String

Torch

INSTRUCTIONS

1. Download and print out the following template. You can then stick the template onto some cardboard (cereal packets are ideal) and then cut out or laminate.
2. An adult then needs to poke holes in the pieces where the stars are and also a slightly larger hole in the middle of the circle (to put string through).
3. Once this has been done assemble the shape so that it is in the form of a cup and stick together with tape.
4. Put the string through the middle and tie a knot at the end so that it is in the cup.
5. You can then pick up the cup with the string so it hangs upside down like a lamp. Place a lit torch upright on a flat surface and lower the lamp over it so that it swings loosely. Enjoy!
